The Safety Stirrup

Safety & Innovation at 360°
The Safety Stirrup for Riders who settle for nothing less than Perfection

OMNIA is the innovative stirrup designed to offer a **unique combination of unmatched safety, excellent stability and absolute comfort** thanks to advanced technical features and innovative materials.

It is the perfect choice for every rider because every detail of **OMNIA** is designed to enhance your performance, ensure your well-being and protect you in case of emergencies, thanks to innovative solutions safeguarded by two patents (patent pending).

OMNIA can be customized by choosing from a wide range of colours for the release system (also sold as **interchangeable accessories**), allowing you to express a unique style through multiple achievable combinations.

Colours:

Interchangeable Accessories

TILTED EYELET

Favourable angle for the foot to be inserted, facilitating the recovery.

PERFECT STABILITY

Optimal and well-balanced weight (680gms) for limited oscillations in case of loss of contact, allowing for a quick recovery and better control of the movements.

OMNIDIRECTIONAL "SAFE RELEASE" SYSTEM

Top-level safety with no obstacles to the 360° flexibility of the release system for a significantly reduced risk of getting stuck during a fall.

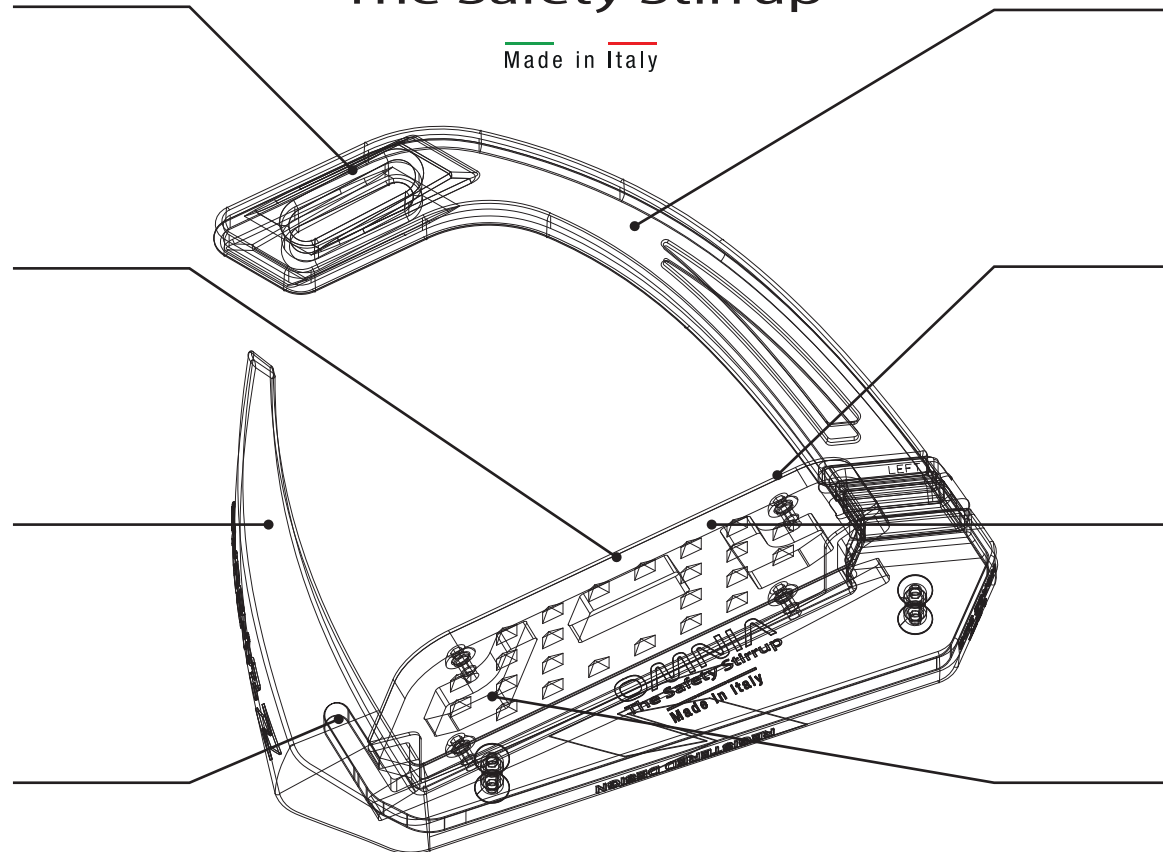

FOOT SUPPORT & CONFIDENT FEELING

The supportive core provides a sensation comparable to a standard stirrup, ensuring safety, comfort, focus and performance.

OMNIA

The Safety Stirrup

Made in Italy

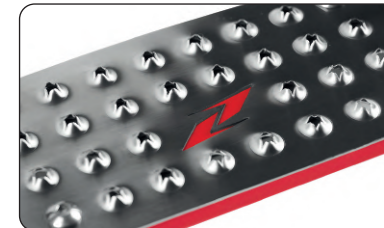

EXTREME LOAD CAPACITY (400kgs)

Engineered to withstand significant pressure, up to 400kgs for each stirrup.

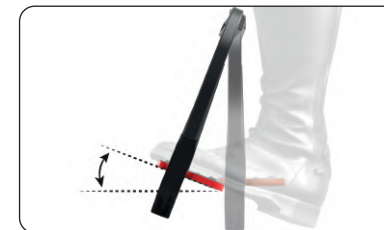

MAXIMUM GRIP

Generous anti-slip tread with grater-shaped surface for maximum grip even in wet or muddy conditions.

SELF-INCLINING CANTILEVERED FOOTBED

Correct and natural position of the foot for improved comfort and reduced stress on joints and muscles.

SAND DRAINAGE HOLES

Unmatchable cleanliness and prevention of build-ups of dirt.
